PRICING

Base Service

The standard database service will be provided using public cloud and will be charged based on their standard published price list. A private cloud option is also available and pricing can be provided for this.

The managed service charge is dependent on the number, size and throughput of the database servers and is based on an estimate of support hours required per month, calculated using the standard rate card.

The following costs are additional and will be quoted based on specific customer requirements

- Communications and connectivity costs
- Email integration
- Active directory integration
- Additional environments for test, development and training
- Additional storage
- DR provision and simulations
- Audit and Compliance support
- Additional Penetration Testing
- Additional security requirements / Official-Sensitive (IL3) operation

A full quotation can be provided against exact customer requirements.

Implementation and Additional Services

Implementation and additional services will be charged in accordance with the standard rate card.

Volume Discounts

Volume discounts are available for user numbers above 100

Termination Charges

A standard termination charge of £ 2,000 covers the closing of the service and the production of a data extract up to 200GB in size in an agreed format. Any additional termination services required will be charged in accordance with the standard rate card.

All prices quoted exclude VAT
