Kubernetes & Cloud Native Computing Experts

LiveWyer are a delivery focused Infrastructure Development company, passionate about the services and technology we deploy. Our expertise includes Kubernetes Solutions, Enterprise DevOps, Cloud technologies and Automation support.

We pride ourselves on earning trust and developing relationships. Our DevOps methodology centres around working with your team to develop an in-depth understanding of your culture, working process and targets. So whether you need help with a short-term target or long-term transformation you can be confident we're working towards the same goals and to help you succeed. Clients we have helped include Ericsson, Comic Relief, Skyscanner, Camelot Group and Sage Pay.

LiveWyer not only provides reliable professional services and access to the latest innovations in IT, we also train our partner IT teams. By sharing our skills with you we aim to improve on your site security, productivity and long term stability.

Founded in 2009, LiveWyer is a privately owned London-based IT Infrastructure company with over 50 years of collective infrastructure experience.

Infrastructure Performance Testing & Health Check

Service Description

Building on our experience working with a wide range of client infrastructures, we will assess your platform and enable you to get the best performance out of your current hardware investment. We identify key issues, propose solutions and work with your Operations team to implement a remedial plan of action.

Service Features

Extensive review of your infrastructure stack.

Identifying key infrastructure metrics.

Customised test-suites aimed at testing all areas of your platform.

Detailed action document highlighting review findings.

Deployment of document findings based on client feedback.

Service Benefits

Maximise the performance from your hardware investment.

Minimise business disruption due to poor infrastructure and site performance.

Detailed and concise report issued upon completion.
