Standard Rate Card

Skills for the Information Age (SFIA) Definitions & Rate Card

Under T-Impact's Standard Rate Card, we work with you to define a work package or deliverable for an agreed price and manage resources accordingly to ensure agreed goals are met. Resources work under T-Impact direction and control in adherence with your policies (e.g. security, IT, health and safety policies).

We are also able to offer resource augmentation, defined as the provision of personnel on a time and materials basis, where such resources work under your direction and control and are expected to complete work using your equipment (e.g. working from your site using computers and infrastructure you provide).

Resource Augmentation Rate Card

Skills for the Information Age (SFIA) Definitions & Rate Card

We are pleased to offer, through G-Cloud, specialist resource augmentation capabilities to complement your existing team. We define resource augmentation as the provision of personnel on a time and materials basis, where such resources work under your direction and control and are expected to complete work using your equipment (e.g. working from your site using computers and infrastructure you provide).

T-Impact will provide appropriately experienced and capable personnel to meet your requirements. There is typically no responsibility for any work product or set deliverables under a resource augmentation engagement. You remain responsible for oversight and assurance of work and retain ownership of deliverables.

This differs from T-Impact's Standard Rate Card, where we work with you to define a work package or deliverable for an agreed price and manage resources accordingly to ensure agreed goals are met.
