Service Features

01 Integrates with data sources such as Azure & AWS DataLakes

02 Databricks unifies data-gathering, model-creation & deployments

03 Reduce cost and complexity with managed, cloud-native platform

04 Identify Trends using Artificial Intelligence within Databricks

05 Import data/reports from Excel, CSV and Access files

06 Self-service collaboration tool for data scientists and analysts

07 Provides valuable analytics from the organisations data assests

08 Integrates with Power BI and other Visualisation platforms

Service Benefits

01 Streamlined data processing workflows

02 Improve services quality, cost, flexibility and safety

03 Reduces deployment and migration times; therefore costs and risks

04 Builds robust, reusable data models to provide consistency in reporting.

05 Secure, cloud-based service with access to management controls
