Amazon WorkDocs pricing

With Amazon WorkDocs, there are no upfront fees or commitments. You pay only for active user accounts, and the storage you use. In most regions WorkDocs costs $5 per user per month and includes 1 TB of storage for each user.

AWS will offer free use of all Amazon WorkDocs features with 1 TB of storage per user for up to first 50 users from March 16, 2020 to September 30, 2020 for all customers that start using Amazon WorkDocs for the first time during this period from their AWS account. This does not include any Amazon WorkSpaces and WorkDocs bundle offering. Click here for more information and restrictions that apply.

Amazon WorkSpaces users receive access to WorkDocs for no additional charge. This includes 50 GB of storage per WorkSpaces user. For a discounted rate of $2.00 per WorkSpaces user per month, this can be upgraded to 1 TB of storage.

You can set limits on the amount of storage your users can use. If you need more than 1 TB of storage for your users, additional storage will be charged at the rates shown below. As you store more data in WorkDocs, the cost per additional GB decreases. All WorkDocs features are available for all accounts
