About The Police ICT Company

The Police ICT Company is owned and funded by UK policing. The Company supports UK policing to keep people safe, get more from technology investments and make better use of public money.

To protect people from harm in our rapidly changing world, police services must not only keep up with technology and business changes, they must develop capabilities quickly and find flexible ways of working.

The Police ICT Company strives to be the go-to partner for technology developments and programmes across UK policing.

Our team provides IT, commercial and consultancy services. We help police forces and law enforcement organisations select, scale and deploy technology, so they can deliver the most efficient and effective service to the public.

Police ICT Cloud Cyber Security Services

The Police ICT Company provides a range of cloud security services including strategy, architecture, design, implementation, support and assurance.

Our team has unique insight and expertise within policing, coupled with key strategic partnerships, to assist UK policing to deliver on its capability and cloud aspirations, in line with the National Policing Digital Strategy.

Additional Information

Onboarding Process

As part of any consultancy engagement with The Police ICT Company, the engagement commences with a project initiation workshop to clearly identify and agree the Scope, Deliverables and Timelines for the lifecycle of the project.

Offboarding Process

All Police ICT Company consultancy projects conclude with a closure process to ensure that all project deliverables have been successfully met and that all relevant documentation has been handed over.
As part of this closure process, key stakeholders will be invited to feed into the lessons learnt and a formal closure report will be provided.

Ordering

The initial phase will involve discussion around requirements and scope of work. The Police ICT Company shall draw up a Statement of Works and following agreement and the completion of a Purchase Order, work will be scheduled for a mutually agreed date.

Invoicing

Invoicing terms will be laid out as part of the Statement of Works agreement. Typically payment will be based on agreed milestones throughout the project. Payment terms are 30 days.

Customer Responsibilities

Customer responsibilities shall be identified on a project by project basis and shall be included in the Statement of Works for mutual agreement.
