Hosted Graphite Pricing

Overview

Hosted Graphite only bills for the number of unique metrics* created in the account.

The number of data-points per minute does not impact the price, nor do historical metrics created previously.

**metric definition*: A metric is a unique identifier paired with a value (known as a 'data point') and optional timestamp, e.g. *my.server.production.cpu.load 13.3*

Retention and Resolution

Data in our multi-tenant SaaS offering is stored at varying resolutions.

5 second data is stored for 1 day
30 second data is stored for 3 days
5 minute data is stored for 6 months
1 hour data is stored for 2 years. Contact us for longer periods.

Dedicated environment retention and resolution is customisable.

SaaS Pricing

Plan Name	Number of Metrics	Number of Alerts	Monthly Price
Tiny Plan	100	3	$19
Small Plan	500	10	$49
Medium Plan	5,000	30	$99

Magnum Plan	30,000	150	$599
Mammoth Plan	65,000	200	$949
Goliath Plan	100,000	300	$1,195
Enterprise Plan	100,000 and above	Call Us	Call us

Dedicated Environment Pricing

We also offer dedicated environments which cater to customers sending millions of metrics, or who want a completely separate environment. This provides dedicated storage, web servers, retention and resolution settings as well as priority support, customisable alerting and security settings, and monthly metric quotas.
