Selective License Pricing

The Arcus Global Cloud Causeway is sold as Software as a Service (SaaS) on a Per-Service Per-Month basis. A service is either an application where the Causeway provides monitored connectivity, or a set of APIs where the Causeway provides API aggregation. The minimum purchase order is for 3 services, which is a £645 per month minimum spend.

Traffic defaults to 1GB per month included in this price, for each additional service additional traffic is included. Additional traffic above the per-service default is available and is charged based on volume and concurrency.

Additional security, monitoring, API versioning and API aggregation services are available but require individual pricing based on your specific use case.

Volume Discount

Volume	Cost per month	Cost per annum
Up to 3 Services (1GB traffic total)	£240 per service (£710 minimum spend)	£2880 per service (£8520 minimum)
Up to 5 Services (2GB traffic total)	£205 per service	£2560 per service
Up to 10 Services (5GB traffic total)	£165 per service	£1980 per service
Over 10 Services (5GB+ traffic total)	£165 per service	£1980 per service

"Up to 5 Services" is our most typical configuration for a local authority.

Implementation Services

There is also one time charge for application delivery, on boarding and data migration. This will be priced in line with Arcus Global's Skills for the Information Age (SFIA) rate card. This can be determined via dialogue or by specifying the functionality required.

Available Discount Combination

Cloud Causeway is available as an integrated element of:

- Arcus Insight as a Service

Maximum available volume discount may bring the price down below the levels shown.
