CONTACT US

ABOUT OUR MODULES

- At Effective Software, we want to help organisations increase workplace engagement in Health & Safety practices.
- For this reason, we don't price according to admin numbers. Our system is designed to make safety everyones responsibility.

“

Unlike other software providers we spoke to, pricing with Effective wasn't restricted by the number of admins that we had or making us pay for things we didn't want. The price was directed primarily by the modules we wanted, our business size and the support level we wanted."

David Hoey
Health & Safety Officer, Hilton Foods

”

ALL PLANS INCLUDE

MOBILE APP

Our mobile safety app Engage allows you to capture and share imagery, locations and custom categories across your safety system, anytime, anywhere.

ACTIONS & NOTIFICATIONS

Our powerful and configurable notification platform allows users to automate notifications to alert managers and admin users when incidents are reported.

REPORTING

The Reporting feature enables automated data integration between modules to eliminate duplicated information. Data syncs back to the central system instantly for metrics, reports and analysis.

HELP CENTRE

Users have access to our extensive help centre, including user guides, webinars and video tutorials. Users can raise a ticket for any technical requests that they may have.

CUSTOMER EVENTS & WEBINARS

Users get premier access to our customer events, tip of the week emails and webinars. We always listen to your feedback and use it make the system as efficient as possible.

ONBOARDING

The Onboarding process is designed to make your move to the software as easy as possible. It covers Sales Handover, Training and System Adoption.

DOCUMENT LIBRARY

The Document Library allows you to store all company documents in one central location. Users can track expiry or review dates, ensuring you never miss a deadline.

REGULAR UPDATES

Users will always have access to the latest updates. Your software is constantly being improved and users are always informed of changes.
