
Airpoint Service Pricing – MPS2

Distribution

Name	Job title
	GCloud 10

Document control

Version	Status	Release date	Reason for change
1.0.0	Final Draft	23/05/18	

Airpoint's below mobile software pricing is split into a modular per user per month basis. Each application module can be selected either individually or cumulatively to meet selective customer requirements.

The Cloud Service element will be reviewed with the customer to establish the hosting needs. This will determine selected units needed which will subsequently be charged on a monthly basis.

Airpoint G-Cloud 10 Cloud Service Pricing	Minimum 500 Users
