

Backup is one of the core business solutions that every business requires. The need for off-site backup has increased tremendously over the last 5 years. The solution Planet IT recommend not only provides an off-site storage location for your backup but also an environment in the cloud that can be 'spun up' in virtual infrastructure to reduce downtime significantly. The table below is a simple table to detail the cost per GB and any implementation services that might be required. Any additional pricing for Software/Hardware that might be required can be supplied upon request.
