Introduction

Our research and development team provide training (in-house and custom) in scholarly, systematic and innovative research on computational intelligence, cyber security, computer network security, enterprise architecture, security operations centres, information assurance and risk management & research methods. The team has published a number of notable articles, journals and books.

Resource and Rate Card

This is a consultancy-based service to help us train SMEs and Government Departments on a number of areas – research methods, Cyber Security, Bespoke training, custom training, in-house, external and online trainings. We price ourselves on the quality, training and experience of our people, and the benefits they will offer to the organisation. Our rate is in alignment to the SFIA levels.

The rate / charge is based on the experience level, role and expertise of the personnel.

Table 1: AREA Consultancy Service Rates

Personnel / Roles	Rate (per day)
Conferences / Seminars	£500
Online	£375
External	£550
In-House	£1000
