

PRICING SCHEDULE

1. Future Fibre™ GigaBurst Pricing:

- 1.1. Future Fibre™ GigaBurst is the Ultrafast product.
(Other options are available on the G-Cloud Framework):

Product	Service Speed	Comments	Monthly Price – Per Property (ex VAT)
Future Fibre™ GigaBurst	Up to 1000Mbps	Gigabit Connectivity	£50

2. Discount

- 2.1. If the Landlord opts to pay up front for the 24 months service then the cost will be discounted as follows:

Product	Service Speed	Comments	Total Contract Price – Per Property (ex VAT)
Future Fibre™ GigaBurst	Up to 1000Mbps	Gigabit Connectivity	£1050

3. Service Qualification Criteria

- 3.1. The minimum order volume for the Connecting Communities service is 200 properties.

3.2. The properties that are provided with the service must all be within a single “neighbourhood”. The “neighbourhood” may consist of a single building containing 200 or more properties (for example a large tower block) or it may consist of a number of neighbouring property blocks which together make up 200 or more properties (for example a housing estate). The maximum distance between neighbouring property blocks within a “neighbourhood” would typically be no more than 50 meters (this can be extended if there are existing utilities ducts between blocks that the landlord can make available to Future Fibre™ for the distribution of its fibre optic cables).

3.3. Each “neighbourhood” must be within 1Km of a suitable dark-fibre to which Future Fibre™ can connect for its backhaul service. This will be assessed by Future Fibre™ as part of the site-survey we undertake prior to accepting an order for the service.
