ASPREY MANAGEMENT SOLUTIONS

1 PRICING

The Asprey Asset Portfolio Manager Solution is priced on an annual rental basis per module and it based on the number of assets under management when purchased.

Module	Asset Range	Annual Rental Cost
Asprey Asset Portfolio Manger Including all modules	Under 1,000 Assets	£22,000
	Up to 2,000 Assets	£24,000
	Up to 5,000 Assets	£25,500
	Up to 1,0000 Assets	£27,000
	Up to 20,000 Assets	£32,000
	Over 20,000 Assets	£34,000

This best of breed solution provides a wide range of flexible, fully integrated modules, with a consistent look and feel, to manage all the key processes required by today's modern social housing enterprises. Whilst available as a single solution to meet the needs of social housing professionals who manage asset management, compliance, works and strategic option appraisal, the Solution can also be implemented as a mix of integrated modules to meet specific needs. Bulk purchase discounts are available should multiple modules be selected. On-premise delivery pricing is also available on request.

1.1 WORKS AND CONTRACT MANAGEMENT MODULES

Module	Asset Range	Annual Rental Cost
Asprey Works and Contract Management	Under 1,000 Assets	£6,500

	Up to 1,0000 Assets	£14,500
	Up to 20,000 Assets	£18,000
	Over 20,000 Assets	£20,000
Asprey Mobile	Under 1,000 Assets	£6,500
	Up to 2,000 Assets	£8,000
	Up to 5,000 Assets	£11,000
	Up to 1,0000 Assets	£14,500
	Up to 20,000 Assets	£18,000
	Over 20,000 Assets	£20,000

2 OUR PRICING GUARANTEES

We aim to ensure that our pricing is transparent and clear to help you make the appropriate functional choices whilst understanding that you have budgetary considerations.

No hidden costs – Our pricing reflects the number of assets managed by your organisation when the Solution is purchased. There is no minimum licence and there are no hidden charges should your organisation add to its property portfolio. Therefore, we do not offer escalating per asset pricing.

No hidden costs – Regardless of modules chosen, Asprey provides the Solution with a Site Licence. This means that there are no hidden charges for additional users.

Unlimited user support – given the range of potential users within your organisation, our support is not limited to a number of users. Anyone using the system can contact our helpdesk for assistance. This option however is only available to users who have had formal classroom training from the Asprey training team. Annual support coverage is subject to our SLA's.

No contract tie in - Asprey do not force long contract terms to maintain annual fees. The initial licence is for a minimum term of 12 months with a simple annual renewal.

Commercial Flexibility – The annual rental fee can be paid monthly, quarterly or annually, depending on your preference.

Interfacing Freedom – Any module from the suite is provided with API's (these are included within the above costs), which means that you or your IT team have the freedom link this solution to any existing system your organisation utilises.

3 WHAT IS NOT INCLUDED

Implementation Services – Our implementation services ensure you have access to an appropriate range of industry specific knowledge and best practise advice available from our highly experienced implementation team. Implementation services are available at £750 per day plus expenses and VAT. Bulk purchase discounts are available. AspreyBI (Option Appraisal) implementation services are available from £950 per day (bulk purchase discounts are available).

A fixed price implementation quote is also available following a free of charge scoping meeting.

Classroom Training – Our product based training is second to none and our professional training team offers fully interactive classroom training sessions aimed at the key areas of functionality that allow users to develop the necessary skills to get the best out of the system. Given the interactive nature of our sessions each session is subject to a maximum of six users. Modular training sessions are available at £750 per day plus expenses and VAT. This assumes all training would be provided on customer site. Bulk purchase discounts are available.

Development – any bespoke development is not included in the above pricing

Hardware or additional third-party licensing - Pricing excludes 3rd party products such as hardware (tablets for mobile working), and Microsoft PowerBI Licences should the option appraisal modelling solution be selected.

**All pricing is subject to VAT and may be subject to annual RPI increases.*
