

Why do CloudCoCo like Meraki?

We can configure everything once centrally, and distribute the switches and access points nationally, drastically reducing time spent on side, and reducing the amount of Professional Services costs that our customers would have to pay with a less intelligent alternative.

Our support staff and customers love the single pane of glass management, and level of detailed information and control that the dashboard provides

The Cisco Meraki wireless solution includes a complete, robust feature set right out of the box. No additional purchase required.

Centralized Management

Seamlessly manage campus-wide WiFi deployments and distributed multi-site networks from a single pane-of-glass.

Multigigabit Ethernet

Pass 2.5Gbps of traffic over a single cable in order to take full advantage of high speed 802.11ac Wave 2 wireless.

Location Analytics

Reveal powerful metrics such as visitor capture rate, user visit time, and repeat visits by listening for wireless devices.

Application Visibility & Control

Identify which applications are being used, and then prioritize critical apps while limiting recreational apps.

High Capacity 802.11ac

RF optimization with real-time spectrum analysis enables high performance wireless in dense, demanding environments.

Automatic RF Optimization

Automatically optimize WiFi by measuring channel utilization, signal strength, throughput, and interference.

Dedicated Security Radio

Instantly detects interference, vulnerabilities, and attacks on all channels.

Identity-Based Firewall

Automatically assigns firewall and traffic shaping rules, VLAN tags, and bandwidth limits to enforce the right policies for each class of users.
