Symology Ltd

May 2018

Pricing

Insight for Bridges & Structures (Cloud Edition) is priced by an Annual Subscription fee, plus an additional annual fee for each Option, plus a fee per user and per mobile user.

Per user and per mobile user fees are per user per month in advance, and can be varied up or down. The number of users required is completely elastic with no limitations as to the maximum number of concurrent users.

Per user and per mobile user fees are also available on fixed a 1 year or 2 year commitment basis, with a lower effective price per month.

These two per user models can be combined, with a base number of users on a 1 or 2 year commitment, and additional users on a monthly variable basis.
