

Proven website hosting solutions. Delivered on time. At an affordable price.

Cloud hosting is a term we are hearing more often in our digital workspace. How is Cloud hosting different from traditional hosting? Businesses are no longer constrained by the outdated, clunky physical systems stored locally to host their websites. Cloud hosting allows you to host your website on several virtual servers, freeing up local resources and providing an abundance of newly founded business benefits.

Our approach

ClearPeople was the first Microsoft UK partner to be awarded Cloud Platform Gold Competency for Microsoft Azure. Together with our expertise in website development and as certified implementation partners with Sitecore, Kentico and Umbraco, we are able to demonstrate our best-in-class capabilities in delivering Cloud platform based solutions to your business. Our simple, no-nonsense approach will help you to understand how to leverage the Cloud's full capabilities to enhance your organisation's productivity and efficiencies.

How it works

Our expert Consultants will work with you to design and implement a secure and cost-effective Azure infrastructure to host your organisations website applications. Whether you are in the process of building a new website or are looking for an infrastructure or hosting partner, our team will help your organisation accelerate the deployment of your website at any stage.

What it looks like

Cloud hosting has unlocked all kinds of possibilities for small businesses and enterprises alike and it's no secret why they are making the switch. Our Essential Azure Website Hosting is a solution that will meet your optimal infrastructure requirements and deliver the features of the future, such as:

Infrastructure & Integration

Rest assured – we will make sure your current line-of-business systems are fully integrated within the Azure environment and that you are ready for your website to be implemented and deployed.

Design & Testing

Your infrastructure and application design will be documented and tested to ensure a successful deployment and exercise high availability.

Security & Support

We will provide load testing to ensure a seamless transition into the Cloud. Our support team is also here around the clock to produce proactive monitoring and health checks, as well as monthly reporting to analyse your Azure consumption.

The benefits

Secure

Building secure solutions in the Cloud is not a goal, it's mandatory. Continuous security processes are built into Azure to maintain a secure and robust infrastructure and platform.

Scalable

You can scale your applications up and down to accommodate peaks in traffic as well as availability across geographic regions, ensuring maximum cost efficiency. What's more, we're experts in implementing hosting solutions across a range of environments with our speciality in Kentico, Sitecore and Umbraco technologies.

Resilient

Hosting your website in Azure offers you peace of mind. Azure's global incident-response team mitigates any threat, offering a solution that is resilient to outages, failures, attacks and disasters. To top it off, a backup and recovery vault is always active to ensure protection against any scenario.

Efficient

Azure is ready to free up your management's time and resources, reducing your risks by increasing protection, and delivering business agility by offering on demand storage to cater to your usage – all whilst being cost efficient

Don't just take our word for it

We're experts in implementing and deploying websites in Azure. With our website development capabilities in Kentico, Sitecore and Umbraco combined with our strong expertise in Azure, we help our customers design and implement a superior and cost-effective Azure infrastructure to host your website.

Amnesty International

The new Azure hosting infrastructure enabled a reliable, flexible and high performance platform that was delivered in time to meet critical business deadlines.

"We're really comfortable with Azure and find it easy to maintain. It just works."

Cystic Fibrosis Trust

The move to Azure enabled the Trust to deploy a scalable and future-proof infrastructure quickly at minimum cost winning Workplace Transformation Project of the Year at the UKIT Awards.

"To say that this has increased productivity and efficiency for the Trust would be an understatement."
