

The image features a red rectangular logo with the word "Ajilon" in white serif font. The background is a collage of digital elements: a laptop screen showing a globe with orbital lines, various colorful application icons (like a magnifying glass, home, mail, and power), and binary code (0s and 1s) floating in the air. A large red diagonal shape cuts across the bottom half of the image.

# Ajilon

## Cloud Support Services

# Cloud Support Services

Ajilon (Trading as Modis International) is the world's leading provider of consulting, outsourcing, projects and cloud support services. We work with you to understand your Cloud Support needs and unique business drivers. We continually place your priorities at the forefront of our approach and have a range of methodologies depending upon your project and requirements, including but not limited to; Prince 2, Waterfall, Scrum, Agile, ITIL, etc to ensure that our teams utilise their expertise with your preferred style of working.

Ajilon works across an incredible range of clients in industry sectors including; Central and Local Government, Military, Health, NHS, Education, Housing, Energy, Aerospace, Financial Services, Transport and Logistics, Charities, Automotive, Electronics and Telecommunications, AI, Robotic and Information Systems. We therefore understand that different departments have a range of aspirations, goals and challenges and we work with you and your leaders to ensure that you gain the best value infrastructure solutions / platforms and services for the outcomes that you wish to achieve.

Harnessing innovations on a global scale requires businesses to adopt new ways of thinking. Ajilon brings together specialised skills and solutions across science and technology disciplines. The world of IT and technology continues to converge and grow at exponential rates as we enter a new era of smarter devices, smarter cities and smarter industries. We ultimately work with our clients to assist with this rapid transformation by leveraging our expertise, knowledge and know-how with the public sector to ensure that it reduces and minimises the impact of operational pressures.

## Ajilon Provides...

### **Agile teams, assembled fast**

Ajilon is a Global brand that delivers locally; collaborating with clients and industry partners to solve business and technology challenges. We do this by developing and deploying highly integrated and efficient solutions.

### **Project Services**

We assemble a multi-skilled team to serve as a fully integrated part of your business. We follow the full ITIL framework and adopt lean six sigma principals and other methodologies to provide governance and service rigor.

With global scale and scope, we ensure that Cloud Support Services and Cloud Support Solutions are delivered to meet your needs. We work closely to support our customers in their ramp up, stabilisation and reduction phases. We continuously improve and adapt our methodologies providing a flexible project approach to meet your requirements. With different commercial models, we offer flexibility and agility solutions to ensure our clients achieve their defined business outcomes and goals.

### **Connects the smartest people to fuel innovation**

Ajilon operates at the heart of today's science and technology convergence. We believe only cross-domain thinking can unlock true innovation. As a global community of specialists, we connect the smartest people and brightest businesses to the solutions that support them to thrive. We partner with our clients to provide cloud and infrastructure services that continually evolve and adapt, exploring and seizing opportunities to provide best value for the UK Tax payer.

### **Why partnership is so important**

By working alongside our clients at every stage of the value chain we can understand their challenges first hand. With our knowledge and cross industry expertise and your unique perspectives, we are able to deliver the most innovative and effective solutions that enhance performance and achieve operational excellence within your department.

### **The way we solve science and technology challenges.**

Professional sectors are no longer siloed, so neither are we. Ajilon is about new perspectives, cross-domain thinking and smarter connections in markets and industries all around the world. We encourage our teams to explore cutting edge technology, to travel the world, to experience a wide range of projects within the world's leading companies and to gain a multi-disciplined perspective on problem-solving. This ensures that we can bring multi-discipline expertise to your project and organisation.

### **Meet the world's smartest people.**

Our Centres of Excellence and Delivery Centres are where connections happen. They act as campuses for the community where; project managers, business analysts, designers, developers, technicians and data scientists (to name a few) all work together to research, innovate and explore fresh solutions for our clients.

### **Outsourced & Managed Services**

Our range of cloud services and infrastructure solutions enable you to rapidly increase both productivity and cost efficiency. We always guarantee the highest quality outcomes on time, which means in this partnership your challenge is our challenge.

We are looking forward to working with you and your team to deliver cloud software / cloud support services that ensures your success.
