About Yotta

Yotta is a leading, global connected asset management software and services provider. We provide proven, robust and innovative Infrastructure Asset Management software that is built to empower those responsible for both the operational and the strategic management of all Infrastructure Assets.

Drawing on our vast expertise and over 30 years of experience within the industry, our consultancy specialists within Yotta complement our software with a breadth of professional knowledge and industry understanding, such that our customers are fully equipped to deliver a proficient service, meet targets and guidelines; and achieve current best practice.

Our software and services enable our customers to resourcefully run all aspects of their operational activities whilst also making more informed and intelligent decisions on how they strategically manage their assets.

Innovation is at the heart of what we do. Whether it's improving data quality by exploring new sensors, developing compelling user interfaces or helping with investment planning to deliver services at the best possible value for money - we work with our customers to overcome any challenges and utilise our software capacity to deliver a holistic, multi-asset modelling approach.

We believe in providing great support which underpins everything we deliver, and continually work with our clients to ensure that they not only get the cutting-edge software available, but also get the best out of the solution; setting them up to succeed.

Extensive research and development is continually employed within our working environment to constantly progress our product functionality and usability and ensure we maintain compliance with industry requirements and best practice.

Yotta is a pioneer in future-proofing software, which enables our customers to exploit the most innovative and effective technology.
