Core-Vet Pricing
Core-Vet - Vetting Management System from WPC Software Ltd.

Product Outline
Core-Vet provides vetting management capabilities for organisations required to undertake vetting work. For accurate prices for Core-vet Cloud Software, customers will choose the relevant license band in Section 1, and then add fixed rate items in Section 2. Also please add any options required in Section 3.

The licensing model for Core-Vet is based on the size of the force. The overall licensing cost is split into bands based on the overall size of the force or organisation. The correct band is to be agreed as part of the implementation process, dependent on functionality and options required.

Section 1 – Annual Licence

<table>
<thead>
<tr>
<th>Force/Organisation size</th>
<th>Total number of staff in organisation (up to)</th>
<th>Monthly Fee</th>
<th>Conditions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Very Small</td>
<td>2000</td>
<td>£650 - £865</td>
<td>1. From the point of cancellation or non-payment the licence is no longer valid.</td>
</tr>

<tbody>
<tr>
<td>2.b. Standard Cloud Software Managed Hosted Service</td>
<td>From £680 per month per instance</td>
<td>This covers the default managed hosted service provided via UKCloud and as defined in the Service Definition document.</td>
</tr>
</tbody>
</table>

Section 3 – Optional Items

| 3.a. Additional Software Training Services | £200 | Per User Per One Day Course.  
With a minimum of 5 and maximum of 15 attendees.  
Providing user and administrator training. Dependant on the number of attendees and requirements of the customer this can be held at WPC HQ or on-site. Price quoted excludes travel expenses. |
|----------------------------------|---------------------|-----------------------------------------------|
| 3.b. Additional Required Software Services | £950 | Per day per person, company standard rate for additional consultancy days.  
For activities outside the scope of the initial purchase, such as providing changes to the system, or back record conversion/data migration services from legacy systems. |
| 3.c. Core-Vet Web Forms Application Module | £420 per month Licence Fee | This option can be supplied in addition to the licence for the overall system outlined in Section 1 or as a stand-alone service. Items in Section 2 will be required to order the Web Forms Application Module as Cloud Software. |

Notes
1. The managed hosted service in 2.b. above covers:
• Provision of a multi-tenanted server environment within UKCloud. Separation between customers is ensured with completely individual databases dedicated to the customer along with dedicated credentials.

• Minimum specification of Medium High Memory server, SQL Server Standard edition, STANDARD service level (99.95% availability from a single data centre), Daily VM snapshot stored for 14 days. Storage up to 200GB. Individual file/attachment uploads cannot exceed 50MB.

• Access via Standard Internet connectivity over common protocols - namely HTTPS, using a SHA-256 Secure Hash Algorithm and TLS 1.2 protocol.

• A Daily VM snapshot for backup, and is stored for 14 days. An additional daily back-up facility is also provided whereby a scripted database back-up is taken to a secondary physical location in a sister-data centre.

• Basic authentication includes a two-step authentication process, where a user is required to log-in to access the service prior to logging into the application itself. Other options (such as two-factor authentication or dedicated VPN) can be made available, although confirmation and additional pricing options will need to be sought from WPC.

The above outlines Core-Vet’s standard cloud software offering. Alternative specifications, resiliency options, back-up processes and access methods are available in addition to or in place of the standard. Customers will need to discuss requirements with WPC should alternative options be required.
