Service Pricing

May 2019

iPLATO Healthcare Ltd

CONFIDENTIAL – DISTRIBUTION LIST

Internal: Management

External: Digital Marketplace - GCloud 11

PRICING

Our pricing model is population based and depends on the size of the audience that the service is commissioned for. Practice list size is the base for calculation of population served. The service can be commissioned by Practice Messaging users or non- Practice Messaging users and is an independent service. The pricing does include activation of the free myGP® patient facing app as part of the overall cost.

Volume Discounts

The larger the population that is commissioned for, the lower the pricing possible. Discounts also apply for purchasing the preGP® product and iPLATO Practice Messaging as a combined package, ask your iPLATO sales representative for more details.

BILLING

Summary of key points as follows:

Setup	No charge
