We are passionate about delivering exceptional value and experience as we help customers select, deploy and manage technology. Here you will find a detailed look into the Microsoft 365 components and cloud software.

Microsoft 365 E3	Cloud Productivity & Security. Licensing suite for Office 365 Enterprise E3, Enterprise & Mobility Suite E3 and Windows 10 Enterprise E3
Office 365 Enterprise E3 Suite	Cloud Office Productivity suite includes Office ProPlus Word, Excel, PowerPoint, OneNote, co-authoring, Outlook Exchange Email, Skype for Business, Instant Messaging, voicemail, video dial-in conferencing, SharePoint collaboration and Teams, OneDrive, Yammer, enterprise social networking, Encryption, Data Loss Protection, Rights Management. Mobile (iOS, Android, Windows phone), desktop (Windows, Mac).

Enterprise Mobility + Security E3

Cloud Enterprise Mobility + Security. Licensing suite includes Microsoft Azure Active Directory Premium P1, Microsoft Intune, Azure Information Protection Premium P1 and Microsoft Advanced Threat Analytics

Windows 10 Enterprise E3 Suite

Windows 10 operating system updated in the cloud with Windows Information Protection, Windows Hello for Business, Credential Guard, Device Guard, App Locker, Windows Defender Antivirus

Microsoft 365 E5

Cloud Productivity & Security. Licensing suite for Office 365 Enterprise E5, Enterprise & Mobility Suite E5 and Windows 10 Enterprise E5

Office 365 Enterprise E5 Suite	E3 (Office apps and Exchange, Skype for Business, IM, voicemail, video dial-in conferencing, SharePoint collaboration and team sites, OneDrive, Yammer, enterprise social networking, Encryption, DLP, Rights Management) plus Phone System call management, PSTN-Conferencing, Business Intelligence, PowerBI-Pro, Delve Analytics, Personal-Org Analytics, Advanced Threat Protection, Advanced Security Management, Customer Lockbox, Advanced eDiscovery.
Enterprise Mobility + Security E5	Cloud Enterprise Mobility + Security. Licensing suite includes Azure Active Directory Premium P2, Windows Server CAL, Microsoft Intune, Azure Information Protection Premium P2, Microsoft Advanced Threat Analytics and Microsoft Cloud App Security
Windows 10 Enterprise E5 Suite	Windows 10 operating system updated in the cloud with Windows Information Protection, Windows Hello for Business, Credential Guard, Device Guard, App Locker, plus Windows Defender Advanced Threat Protection
Microsoft Advanced Threat Analytics	Provides a simple and fast way to understand what is happening within your network by identifying suspicious user and device activity with built-in inteligenve and providing clear and relevant threat information on a simple attack timeline

Azure Information Protection	Classify and label data at the time of creation - protection (encryption + authentication + use rights) can then be applied to sensitive data.
Azure Active Directory Basic	A full suite of identity management capabilities including multi-factor authentication, device registration, self-service password management, self-service group management, privileged account management, role based access control, application usage monitoring, rich auditing and security monitoring and alerting.
Azure Active Directory Premium	A full suite of identity management capabilities including multi-factor authentication, device registration, self-service password management, self-service group management, privileged account management, role based access control, application usage monitoring, rich auditing and security monitoring and alerting.
Microsoft Cloud App Security	Enterprise-grade security for cloud apps - both approved and unapproved - for deeper visibility, comprehensive controls, and enhanced protection against cloud security issues.
Microsoft Intune	Mobile device management, mobile application management, and PC management capabilities from the cloud.
Exchange Online Kiosk	Exchange Online Kiosk is suited for deskless workers to provide business class email, contact management and calendaring services with up to 2Gb per user. Includes anti-malware and spam filtering. Access is also provided to Shared Mailboxes and Group Mailboxes.

Exchange Online Plan 1	Exchange Online Plan 1 provides business class email, contact management, calendaring services. 50Gb per user. Access using the rich Outlook client, tablet / phone apps or internet browsers. Includes anti-malware and spam filtering. Interact with Shared Mailboxes, Group Mailboxes, Public Folders, OneDrive, Office, 3rd party apps and more.
Exchange Online Plan 2	Exchange Online Plan 2 provides email, contact management and calendaring with unlimited storage, anti-malware and spam filtering, data leakage protection (DLP), and legal hold. Access using Outlook client, tablet / phone apps and browsers. Interact with Shared & Group Mailboxes, Public Folders, OneDrive, Office, 3rd party apps.
Exchange Online Protection	Exchange Online Protection protects your cloud based or on-premises email with anti-spam and anti-malware protection. Financially backed SLAs and 99.999% network uptime, including protection of 100% of know viruses and 99% of spam. Reporting and message trace capabilities. Policy based filtering.
Exchange Online Archive	Cloud-based, enterprise-class archiving solution that solves archiving, compliance, regulatory and ediscovery challenges. Immutable preservation of information with in-place hold, with a well-integrated user experience. Unlimited archive storage of Exchange data using retention policies.
Office 365 Exchange Advanced Threat Protection	Protect your email in real time against unknown and sophisticated attacks, through automatic analysis and detonation of suspicious content and unsafe URL links, when included in emails. Gain insights in to who is being targeted and the category of attacks, including blocked message investigations and URL trace capabilities.

Office 365 Plan K1

Productivity tools can benefit everyone, including those without a desk or office, such as shift or frontline workers, or users who share a PC. Kiosk plans such as Office 365 Plan K1, are designed to provide services to improve communication and collaboration for these workers and now include further features

Office 365 Plan E1

Online versions of Office with email, instant messaging, video conferencing and co-authoring. Anti-virus and anit-spam, 50Gb mailbox, 1TB file storage, HD video conferencing, Office Online, Team Sites and Enterprise Social Networking.

Office 365 Pro Plus

Office 365 Pro Plus gives you Office, wherever you go, with latest tools for productivity, collaboration, compliance and BI. Always have uptodate versions of familiar Office applications, no matter which device you're using – PC/Mac, tablet or phone. OneNote, Word, Excel, PowerPoint, Outlook, Publisher, Skype for Business, Access, OneDrive.

Office 365 Import Service

Enables import of PST files to Exchange Online mailboxes and documents and data in to SharePoint Online. There are two import methods: Network upload, where data files are uploaded over the network; and Drive Shipping, where encrypted data files are physically shipped to Microsoft.

Office 365 Extra File Storage

Should you require additional space over and above the space made available per Office 365 user, then this can be purchased on a per gigabyte (GB) per month basis.

Office 365 Advanced eDiscovery

Advanced eDiscovery reduces your eDiscoverycosts by using machine learning to analyse relevant data, to allow more efficient document review and data reduction decisions. You can work with data stored in Exchange Online, SharePoint Online, OneDrive for Business, and Skype for Business.

Office 365 Customer Lockbox

Customer Lockbox gives customers explicit control over in the very rare instances when a Microsoft engineer may need access to customer content to resolve a customer issue. This is in addition to in-built Role Based Access Control (RBAC) Lockbox process that provides just-in-time, limited and time-bound authorised access.

Office 365 Advanced Security Management

Advanced Security Management enables you to set up anomaly detection policies, so you can be alerted to potential cybersecurity breaches of your network. Anomaly detection works by scanning user activities and evaluating their risk against over 70 different indicators, including sign-in failures, administrator activity and inactive accounts.

OneDrive for Business Plan 1

Cloud File Storage. Securely store all files and share within and outside your organisation. Files can be synchronised across devices, allowing access to them anywhere, even when you're not on online. Find files in seconds using search. OneDrive for Business is included in SharePoint Online or purchased separately.

OneDrive for Business Plan 2

Cloud File Storage. Securely store all files and share within and outside your organisation. Files can be synchronised across devices, allowing access to them anywhere, even when you're not on online. Find files in seconds using search. Also includes information management, data loss protection, ediscovery and legal hold.

SharePoint Online Plan 1

Easily create and manage team-focused and project-focused sites for collaboration. In addition, you can deploy an organisation-wide intranet portal to disseminate information and news across the organization. Use it as a secure place to store, organize, share, and access information from almost any device via a browser.

SharePoint Online Plan 2	Easily create and manage team-focused and project-focused sites for collaboration, or deploy an organisation-wide intranet portal to disseminate information and news. Securely store, organize, share, and access information from almost any device via a browser. Manage information using policy based data loss protection, ediscovery and legal hold.
Skype for Business Phone System	Cloud Voice. Skype for Business Phone System call management enables you to use Skype for Business and either your company's existing phone lines or Skype for Business PSTN Calling service. Place, receive, transfer, and mute / unmute calls, from nearly anywhere with internet access.
Skype for Business Plan 1	Microsoft Skype for Business Online is a hosted communications service that connects people anytime and from virtually anywhere and any device. It gives users access to presence, instant messaging, audio and video calling, rich online meetings, and extensive web conferencing capabilities.
Skype for Business Plan 2	Microsoft Skype for Business Online is a hosted communications service that connects people anytime and from virtually anywhere and any device. It gives users access to presence, instant messaging, audio and video calling, rich online meetings, and extensive web conferencing capabilities.
Skype for Business PSTN Conferencing	Users can host or create meetings that contain dial-in phone numbers. Callers can then use those phone numbers to voice call into a meeting using their phone. You only need to set up dial-in conferencing for users who plan to schedule or lead meetings.
Microsoft Yammer Enterprise	Yammer is a secure private enterprise social network. Yammer empowers employees to be more productive and successful by enabling them to collaborate easily, make decisions faster, and self-organize into teams to take on any business challenge. It's a new way of working improves relationships with both customers and partners.

Microsoft Power BI	Power BI is a cloud-based business analytics service that enables anyone to connect to, visualize, and analyze data with greater speed, efficiency, and understanding. It connects users to a broad range of live data through easy-to-use dashboards, provides interactive reports, and delivers compelling visualizations that bring data to life.
Microsoft MyAnalytics	Provides statistics that help people understand how they spend their time at work. Users discover trends for the most important aspects of their day including meetings, email, focus time, after hours. They can use this information to assess how to most effectively rebalance their schedule, and be more productive.
Skype for Business Calling Plans	PSTN voice calling is an add-in to Phone System that allows you to search for, acquire, and assign phone numbers to users in your organization so that they can make calls to and receive calls from people inside and outside of the organization, directly from Office 365.
Microsoft Project Online Premium	Cloud solution for project planning and control, project portfolio management (PPM). Delivered through Office 365. Project management capabilities to plan, prioritize, and manage projects and project portfolio investments. Project Online can be used by administrators, portfolio managers, portfolio viewers, project managers, resource managers, team leads, and team members.
Microsoft Project Online Essentials	Enables project team members to edit and submit timesheets, collaborate on project related documents, update tasks, log issues. It helps organisations govern and measure progress across many projects and initiatives effectively. Project Lite can only be used in the context of projects that are managed with Microsoft Project Online.
Microsoft Project Online Professional	Microsoft Project for Office 365 delivers the latest version of Project Professional as a desktop subscription through Office 365, and your software is automatically kept up to date by the Office 365 cloud service with options for customizable policies.

Microsoft Visio for Office 365	Microsoft Visio Pro for Office 365 delivers the latest version of Visio Professional as a desktop subscription through Office 365, and your software is automatically kept up to date by Office 365 cloud services with options for customizable policies.
Micosofot Office 365 Advanced Data Governance	Office 365 Advanced Data Governance applies intelligence to make it easier than ever to retain the data that is most valuable to your organization, while reducing your overall risk profile by allowing you to delete what you no longer need.
Microsoft Office 365 Threat Intelligence	Provides insight into the threat landscape to your organization. Analyze data from Windows endpoints, Azure Advanced Threat Analytics, and Office 365 Advanced Threat Protection to alert organizations to threats. Security administrators can use data to track threat actors and trends to better defend their assets.
Microsoft Security and Compliance Package	A Package of licences (O365 ATP, Advanced eCompliance, EMS E5 and Win E5) available under the DTA MOU (VL EAS Licensing) to provide support for cybersecurity and GDPR compliance
Microsoft Office 365 Package	A Package of licences (O365 E3 and Win E3) available under the DTA MOU (VL EAS Licensing) to provide Office 365 Productivity and Windows Enterprise.

Advanced Threat Protection (ATP) Plan 1	This new package combines Office 365 Advanced Compliance and Azure Information Protection. It's designed to help compliance and IT teams perform ongoing risk assessments across Microsoft Cloud services, automatically protect and govern sensitive data throughout its lifecycle, and efficiently respond to regulatory requests leveraging intelligence.
Advanced Threat Protection (ATP) Plan 2	This new package combines Office 365 Advanced Compliance and Azure Information Protection. It's designed to help compliance and IT teams perform ongoing risk assessments across Microsoft Cloud services, automatically protect and govern sensitive data throughout its lifecycle, and efficiently respond to regulatory requests leveraging intelligence.
Information Protection & Compliance	This new package includes advanced threat protection services including Microsoft Threat Protection (Azure Advanced Threat Protection (ATP), Windows Defender ATP, and Office 365 ATP including Threat Intelligence), as well as Microsoft Cloud App Security and Azure Active Directory.
