

# RATES/COSTS OF SERVICES

We provide a range of FastStart Software Solutions with different pricing models which rely on a number of variables to build up the fees we propose, and these are unique to each project. Therefore we do not have a fixed schedule of rates.

- Key variables that are taken into consideration are:
  - Type of solution to satisfy client scope of requirements and size of project
  - Number of FastStart solution modules selected
  - Size of the organisation that will use the solution
  - Implementation requirements such as:
    - required configuration of existing workflows
    - level of integration with existing platforms
    - data integration, migration, reporting and graphic dashboards
    - SaaS or on-premise implementation

Annual fees range from £25,000
