As a European Splunk Partner of the year Adarma has been a leading global Splunk Value Added Re-seller for the past 7 years, supporting customers in the successful adoption and exploitation of the technology as well as selling the product.

This includes advising, implementing and providing on-going consulting/engineering capabilities for Splunk to many of the UK's best known organisations as well as providing end-to-end managed services involving Splunk including "Managed Splunk", where platform maintenance is performed by Adarma specialists, and "Managed SOC", where Splunk is used as a core part of the overall Adarma award winning SOC service.

The breadth of our capabilities, longevity of our relationship with Splunk and consistency in delivery and achieving business success, has made us the preferred Splunk Software and Services partner of choice for the FTSE 250. In addition to the Awards and acknowledgements from Splunk directly, our proven track record and high standard of delivery has been recognised on an even broader scale, leading to the receiving of numerous other capability led industry awards.

Consulting

As a Splunk Professional Services partner, we help you align your IT strategy with your business strategy. Our in-house team of certified Splunk consultants work directly with you, advising on complex or bespoke technical requirements and understanding how to maximize the ROI of your Splunk investment. We help you realise your potential, show you how to unlock valuable insight for informed innovation and provide both business and technical departments detailed insight into their operations.

The expert level of our consultants allows us to work with you to develop your own internal Splunk Centre of Excellence, something we have been responsible for implementing within several of our leading clients to date. This includes advising and working with you on the implementation and introduction of people, processes and technologies that allow you to fully utilise Splunk as a strategic tool across your business.

Engineering

Quite simply, at Adarma, we roll-up our sleeves for the hands-on implementation of Splunk technology. Our highly skilled team of certified Splunk engineers work with you to configure Splunk use cases, searches, premium apps and more. Our engineers can install and configure any aspect of Splunk and have amassed experience with some of the largest, most innovative and advanced Splunk implementations across a wide variety of commercial organisations, from the largest global financial and retail giants, through to specialist engineering, energy and IT customers.
