Resources are based in Skopje, Macedonia or Sydney, Australia. Remote resources can be deployed on site in the Schengen Zone, UK, or US as required for the following additional fees:

- Travel stipend of €300, £275, or USD$468 (hotels, meals, etc) per day
- Airfares at cost + 5%
- Visa processing fees at cost + 5%

These rates are for bespoke software development and business consulting. Project-specific intellectual property developed particular to the project in the course of the Services transfers to the end customer unless explicitly stated otherwise.

Sorsix development competencies

Members of our team have experience in most current technologies and across a variety of industries. A summary is provided below, but a full company profile is also available on request.

Technologies

Our traditional development stack combines a **Java back end**, **Postgres SQL database**, and **Angular front end**. We also employ the following technologies as required by customers:

- Java
- .NET
- Javascript
- Ruby
- React
- React Native
- Angular
- Node.js

- Hibernate
- C++
- C
- jQuery
- PHP
- HTML
- Tapestry
- Python

- R
- Postgres
- MySQL
- MSSQL
- Oracle
- SPSS
- C#

Business analysis and data science projects often use the following application and technology competencies, all of which are available:

- Python
- R

- Postgres
- Tableau

- PowerBI
- SPSS

Our team has extensive cloud devops experience working in Azure, AWS, and VMWare. We often use the following tools for devops and related activities:

- Kubernetes
- Docker
- Flask

- Jenkins
- Ansible
- OpenStack

- Nginx
- Apache
- Gitlab

Engagement

Our team are available to work across all typical stages of a software project:

1. Workshops/scoping
2. Detailed requirements and design phase
3. Systems architecture
4. Development
5. Testing and validation
6. Support and maintenance

Our team typically follow an Agile process and work in the Sorsix task management system, supplying regular reports to the customer. However, we are able to work in a customer's task system and integrate seamlessly with a customer team as needed. Typically the team will make daily or weekly drops of code to a customer's repository for review.
