

## Shiken, pricing sheet for NHS **G-Cloud supplier application**

We would like to work with customers to define the right price, for the right product. We provide many different tiers of the product, with potential add-on services, which help to address specific concerns for institutions.

As such, our prices are typically determined by the number of users within an organisation and the organisational needs.

As such, whilst we can provide a high-level guidance for price ranges (stipulated elsewhere in this application), we feel it's best to work with the customer to identify the right solution at the right price.
