Landmark Cloud Geospatial and Addressing Service Unit Pricing Guide

The Landmark cloud geospatial and addressing service has multiple options for individual customers ranging from very simple integration to the implementation of complex geospatial services. Pricing is therefore dependent on multiple variables which we will discuss and agree with customers at point of enquiry and which will dovetail with their exact requirements.

Additional labour resource elements to customise elements of the service to meet individual requirements is based on labour rates in the attached Landmark SFIA day rate table.

Typical pricing regimes include:

<table>
<thead>
<tr>
<th>Nature of Geospatial service</th>
<th>Pricing (from)</th>
<th>Pricing (to) (indicative)</th>
<th>Variability factors</th>
</tr>
</thead>
<tbody>
<tr>
<td>WMS digital mapping feeds</td>
<td>£1,500 per annum</td>
<td>£20,000 per annum</td>
<td>Usage, number of users</td>
</tr>
<tr>
<td>Visualisation and Query of mapping data via Interactive web mapping application through common web browsers</td>
<td>£1,500 per annum</td>
<td>£20,000 per annum</td>
<td>Usage, number of users</td>
</tr>
<tr>
<td>Complex bespoke analyses using geographic data inputs and geo-processing tools</td>
<td>£25,000 per annum</td>
<td>£250,000 per annum</td>
<td>Nature of service required, number of users</td>
</tr>
<tr>
<td>Complex secure, cloud geospatial managed services</td>
<td>£50,000 per annum</td>
<td>£500,000 per annum</td>
<td>Nature of services required, number or users, platform availability characteristics</td>
</tr>
</tbody>
</table>

All prices exclusive of VAT
