DevOps Maturity Assessment

In an age of knowledge workers, where the difference between managers and workers is disappearing, we believe lasting change must be delivered from within. The AL-Way focuses on building high performing internal DevOps teams, tapping existing potential to create an ultimately self-sufficient DevOps capability. This ‘inside-out’ approach both scales and outlasts any consultancy engagement.

Service Description
Automation Logic's DevOps Maturity Assessment is designed to help organisations determine how effectively they are adopting DevOps practices and building sustainable capability. To assess this, a number of topics are reviewed and scored within 4 key areas; technical, metrics, process and culture. The assessment can be delivered as a workshop ideally with representatives from Development, Operations, Security, Architecture and the Business, or as a deeper dive assessment where evidence is gathered across each team to inform current state scoring and the aspiration.

Facilitated by a partner or senior AL consultant, key stakeholders discuss their current experiences of the software development, change and release processes to establish a score in 20 key capabilities which are proven to have a strong positive correlation with high performing DevOps teams. These are:

<table>
<thead>
<tr>
<th>Technical</th>
<th>Metrics</th>
<th>Process</th>
<th>Culture</th>
</tr>
</thead>
<tbody>
<tr>
<td>Deployment Automation</td>
<td>Visualisation of Work</td>
<td>Architecture Representation</td>
<td>Job Satisfaction</td>
</tr>
<tr>
<td>Continuous Integration</td>
<td>Agile metrics</td>
<td>Customer Representation</td>
<td>Collaboration</td>
</tr>
<tr>
<td>Version Control</td>
<td>Monitoring</td>
<td>Security Representation</td>
<td>Learning</td>
</tr>
<tr>
<td>Test Automation</td>
<td>WIP limits</td>
<td>Change Approval Process</td>
<td>Trust</td>
</tr>
<tr>
<td>Architecture</td>
<td></td>
<td>Visual Value Stream</td>
<td></td>
</tr>
<tr>
<td>Test Data</td>
<td></td>
<td>Small batches</td>
<td></td>
</tr>
</tbody>
</table>

Output: DevOps capability score and roadmap specific to your organisation, in addition to the capability marking scheme to enable you to re-run the workshop and establish how you have improved.

Features
- Assessment of capabilities with strong positive co-relation to high-performing teams
- Individual scores for 20 capabilities grouped into 4 key categories: Technical, Metrics, Process, Culture
- Overall DevOps capability score and customer-specific roadmap
- Assessment of progress made on the learning journey
• Enables organisations to indentifying training requirements to bridge skills gap

**Benefits**

• Repeatable approach to continuously improve DevOps capability
• Significant productivity improvements Increased user value
• Accelerated adoption of DevOps practices
• Improved alignment / collaboration across different teams and functions

**Pricing overview (including volume discounts or data extraction costs)**

Pricing starts at GBP £12,000 for 1 DevOps assessment.

Volume Discounts: If purchased as part of a regular or subsequent audit on performance (twice a year or more, for two years or more), a 15% discount will be applied.

Data Extraction costs: N/A

What is not included in the price: Facilities related such as where the training will be conducted (hotel rooms and meeting space), specific resources dedicated to the equipment, utilities, software and hardware maintenance if required and lodging for participants if they are required to stay overnight.
