SoundsLikeIBS has two deliverable components…

1) The SoundsLikeIBS App for patient use that delivers the SoundsLikeIBS Program

2) The SoundsLikeIBS Pro Hub – A web based admin tool for Healthcare Professional and Organisational use with Hierarchical Realtime Group Reporting & Auditing

1) SoundsLikeIBS App

There are three version of the app available on both iOS and Android operating systems…

	IBS LITE	IBS	IBS PRO
	The patient needs to be online when they are using the Program. All media is streamed to the device.	The patient need not be online at all on iOS to us the Program. On Android the patient has the option to download the media and once downloaded they needn't then be online in order to use the Program.	This version of the app can only be used in conjunction with a Healthcare Professional using the SoundsLikeIBS Pro Hub. As part of their package the Healthcare Professional would purchase a series of 'Unlock Codes' which they can give to patients who can input this code into the SLIBS Pro app to access the Program.
Android	£2.99	£9.99	Free to the patient
iOS	£2.99	£9.99	Free to the patient

1) SoundsLikeIBS Pro Hub

There are three types of user of the SoundsLikeIBS Pro Hub

i) Individual Healthcare Professionals
A Healthcare Professional would purchase a number of one use 'Unlock Codes' which they could then give out to their patients who could then download the SLIBS Pro app, enter their code and have access to the Program.

The Healthcare Professional would then have the ability to monitor his patient's progress in realtime and compile anonymised Group Reports and Audits based on their patient community.

Price for Unlock Codes	£9.99 per code

----

ii) Organisational Users

This type of user is able to amalgamate the data from a number of Healthcare Professionals into a group and compile anonymised Group Reports and Audits based on this patient community.

A typical Organisational User may be a GP Practice Manager. They may have a number of SoundsLikeIBS Healthcare Professional users within their practice. The Organisational User has the ability to amalgamate all the data from each of their Healthcare Professionals (with their consent) and compile anonymised Group Reports and Audits based on this combined patient community.

Another type of Organisational User may be a Clinical Commissioning Group (CCG) who would like to look at all GP Practice Organisational Users within their region. Again, with consent, SoundsLikeIBS Pro allows this linking of data to produce realtime audits.

This linking and amalgamation of different datasets can continue hierarchically right up to Department of Health level.

Price for Organisational User	£500 per annum

iii) Researchers

Similar access to that as described above but on a totally anonymous basis.

Price for Researchers	£500 per annum
