

# Chorus Financial Pricing G-Cloud 12

## Combat Fraud and Money Laundering

## Chorus Financial price per licence

Product Name	Software Licence (price per user)	Cloud Hosting (price per user)	Total (price per user)
Chorus Financial	£10,000	£500	£10,500

## Chorus Financial Cloud Licence Agreement

The fees are calculated on a per licence annual subscription model.

The annual subscription fee includes:

Technical Helpdesk Support;

Business week, Mon - Fri, 08:30 - 17:30, telephone & email support;

System enhancements;

Data template support; and

Solution upgrades and updates.

Each licence allows one named user.

One user will be trained for free per licence.

Prices exclude Value Added Tax (VAT) which will be charged at the prevailing rate.

Cloud usage is subject to our Usage limitation (see section 3.6 of the Chorus Hosted Licence Agreement).

All Professional Service/Service Delivery elements exclude all business expenses (i.e. travel, accommodation, sustenance) which will be charged at cost.

Minimum contract length is 12 months.

Multi-year and payment in advance discounts of up to 15% are available (on the Software Licence price only).

Enterprise pricing applies where there are a significant number of users (>150).

## About Us

Chorus Intelligence Limited is a trusted supplier of data cleansing and analysis software for law enforcement, government agencies and financial institutions across the globe. We simplify and enhance the integrity of data by providing industry-leading investigative software that enables our customers to confidently turn data into intelligence and evidence.

Chorus now has a suite of award-winning products and is used by most police forces and all counter terror units in the UK. Chorus has been used effectively in some of the highest profile cases the UK has seen recently. Our suite of products provides a fully integrated solution for digital intelligence and investigative challenges.

We also provide a range of accredited training courses to help you understand and analyse different types of data that can be used as intelligence in investigations.
