1 Overview of Pricing

Orion Health Amadeus is an award-winning interoperability platform which supports the development of Integrated Digital Care Record solutions including Population Health Management and Precision Medicine. Amadeus is a proven, scalable integration platform consisting of components interacting via industry standard interfaces to support the acquisition and aggregation of data to create a trusted single citizen record, which can be accessed by health and care professionals. The modular nature of the Amadeus Platform allows for components to be added over time depending on individual customer needs. A full description of the core and optional modules is provided in the Service Definition Document.

1.1 Fixed Price

The pricing is based on a standard 'out of the box' configuration of the core Amadeus Platform with Support and Application Managed Services at a total value of 480K GBP for a minimum of 5,000 users on a two year term, as detailed:

Service Description	Service Charge/Unit	Unit	Annual Fee
Amadeus Core Platform with Support and Application Managed Service	8 per user per month	Per user/minimum contract of 5,000 users	480,000

All prices are provided in £GBP

All prices provided are exclusive of VAT.

All prices are offered in accordance with the terms of the Orion Health standard license and support agreement.

1.2 Variable Price

Due to the variable nature of customer projects, an initial discovery phase will be used to obtain information relating to specific customer requirements. Information obtained during this phase will be used to agree and price all variable and optional components. All variable components of Amadeus to be priced under individual Call Off including:

- Deployment services including data and application integrations
- Amazon Web Services hosting and cloud service
- Electronic Master Patient Index
- Terminology Services
- Application Managed Service (AMS) beyond the scope of the core platform (offer may vary depending on range of AMS services to be defined).
