Standard Pricing – myCarepod® Personal Health Record

Licence and Hosting charges

The standard charges below relate to a single **integrated** deployment of the myCarepod Personal Health Record for a single healthcare organisation, integrated across the healthcare ecosystem and based on a maximum of 10,000 users.

Licencing

- **£10,000** one off on boarding fee
- **£80,000** annual charge

Standard Managed Cloud Services as an additional service

- **£3,500** one off set up fee
- **£7,500** monthly charge

Implementation charges

Implementation of the myCarepod Personal Health Record within the healthcare infrastructure to gain maximum benefit will require specific integration of systems during the on-boarding process –

Interfaces are approximately charged at **£15,000**/interface Our experience shows that one interface is typically required for: LABS.

Typical Resource required for delivery of successful project : **£30,000**

- Project Management
- Senior Technical
- Business Analysis

We also supply data migration at a cost of **£20,000**/migration should the Client request this service.

For 24 months a typical Excelicare EMR implementation, including Silver Support Subscription for a Basic implementation, will cost **£377,000** (including one Interface, excluding Managed Cloud Services and Data Migration).

All charges are exclusive of VAT. Pricing is valid for a period of 12 months from the Effective Date of the framework agreement, at which time Excelicare reserves the right to amend the charge after this period.

These charges are based on the delivery of a typical myCarepod Personal Health Record project. Specific options or additions required by your organisation will be addressed on a project by project basis.
