

Groop is a Software as a Service (SaaS) business providing a Community Management Platform under a licensing model, based in Wiltshire, England.

Groop offers a full circle eco-system which covers all aspects of managing a hierarchical organisation across its structures, linking staff, volunteers and beneficiaries.

Groop provides risk management for volunteering, 24/7; taking care of the compliance, communications and data so staff and volunteers can get on with saving the world.

Groop is;

- **Scalable** – architecture to handle millions of users
- **Resilient** – resilient architecture that copes with the failure of individual components
- **Secure** – secure architecture with UK Sovereign-held data
- **Has separate services** – allows separate services to be developed in tandem and easily integrated into the stack

Our vision & mission

Vision

Everyone belongs and is inspired to take part; embracing life's opportunities.
