G8CC Pricing.

G8CC

G8CC user/bot pricing.

G8CC is configured in Multi-Cloud infrastructure that suits your needs.

You can do this without contacting GARNET8 Limited. This model gives you greater flexibility to control everything about your private G8CC SaaS.

G8CC has a single and very simple pricing structure.

The price is:

£49.95

Which includes
2000 automated tasks and 2000 API calls.

G8CC has built in automated bots. These bots get priced as a user. They use the automated task and API call allocation. G8CC is priced on a Per User/Per Month basis.

If you use G8CC as a Data Platform without users. The total automated tasks and API calls will be divided by our automated accounting system. This will then calculate the total users based on number of automated tasks and API calls £49.95 per user/per month.

Your Cloud IaaS pricing will be payable to your Cloud provider.

Integration developer service.

Due to COVID-19 and social distancing etc, we now offer a remote integration service.

G8CC can be used as a stand-alone Cloud platform or integrated with existing Cloud databases and APIs. You can do this integration yourself or use our remote integration service. The remote integration services is priced at:

£699.99

per day/per developer.

All prices exclude UK VAT.
