- Health device and wearable integration

- **GP Record Access including:**

- Repeat prescription ordering
- Prescription delivery
- Appointment booking
- GP practice messaging
- View consultations and test results
- Download entire medical history including vaccinations

- **Trusted Access**

- Carers' Passport
- Share with NHS and private health providers

- Provide an information sharing environment that supports personalised care and empowers people to look after themselves better, making informed choices about their own health & care.
- Improve people's experience by avoiding the need to provide the same information to different health & care professionals time and time again.
- Improve health & care professionals' understanding of an individual's condition, which helps develop a personalised treatment plan.
- Improves safety and efficiency by making comprehensive and reliable allergy, medication, diagnosis and social circumstance information readily available.
- Prevents unnecessary admissions to hospital by giving health & care professionals more information about the individual when making their professional decisions.
- Saves time by reducing the need to manually request information.
- Saves money and effort by avoiding duplicate tests or assessments.
- Improves people's adherence with medications and care plans by providing individuals with access to shared records.
- Supports more accurate understanding of local populations, allowing services to be designed more effectively around an individual's needs.

Pricing ranges from **£0.00 to £1.00 per user per year**.

A cost savings share scheme is also available, where Evergreen Life would take a percentage of the money saved via the use of our platform.
