

## **digitalenergy Professional (Energy Management Portal) Commercial Pricing**

Given that the commercial structure of the licensing is based upon a renewable annual license, we view every client as a key account and therefore commit to a pricing strategy which demonstrates a partnership approach to our engagement. This also ensures a seamless implementation and development of an energy management solution to enable you to optimise the benefits across your business.

The commercial proposition for annual licensing for digitalenergy Professional (Energy Management Portal)

License Implementation		
	Unit	Annual
Annual Licensing (per building)	1	£100

The initial term of engagement is three years; all costs are fixed for the period of the license and all costs exclude VAT.

Annual licensing and support costs are invoiced 100% on the date of availability of access to the system for the licensee, and thereafter annually on the anniversary of that date.

Over the term of the license agreement there are a number of options that can be considered to further more personalise and enhance your professional license.
