

Business Intelligence (BI) and Management Information (MI) Consultancy Pricing

Overview

The cost is based on a combination of the the number of user types required to deliver the solution together with hosting requirements, which will be based on the volume of data to be hosted and expected number of users.

All development costs are calculated using the associated G-Cloud (SFIA) staff rates and estimated effort based on analysis of the requirements.

User costs

12 month contract cost based on the 4 user types below.

	* Term cost per user per annum
