

Pricing

Our cloud support consultancy and training services are priced at £90+VAT per consultant hour (£120+VAT for directors) for most work undertaken, including scoping, content development, training, strategy development, coaching and follow-up support. Simpler work such as basic project administration and community management is undertaken at a lower rate of £45+VAT/hour. We cost projects by the hour, and the minimum unit for training or consultancy work is normally one day (8 hours).

Our product-based services, e.g. Social Simulator simulations or Digital Action Plan workshop programmes are priced according to separate ratecards. Social Simulator exercises including platform deployment start at £2,500+VAT. Digital Action Plan group-based blended digital skills programme start from £450+VAT/person.

Consultancy, website development and training projects are usually quoted to clients on a fixed price basis with an accompanying scope of work.

Our on-going support costs are normally priced at an agreed number of hours/month at the standard rate. Work in addition to this is negotiated with clients separately, but typically at similar rates unless out-of-hours working or fast-turnaround is required.

Large projects (over 12 days) are typically subject to discounts dependent on the nature of the work (training, consultancy, cloud software deployment etc).

We generally pass on third party costs, e.g. for cloud software, at cost price, and likewise expenses.
